DETAILED ACTION

1. This communication is in response to applicants Amendment after non-final rejection received on 07/09/2009.
2. Applicant's arguments with respect to the claims rejection 33, 35-43 and 46 under 35 USC § 103 have been fully considered and are persuasive. Therefore, the rejections have been withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stephen M. Hertzler, Reg. No, 58,247 on September 25, 2009.

The application has been amended as follows:

In the claims:

Claims 47-61 (Cancelled).

The limitations of claims 47 use the phrase "means for", but because there are no explicit correspondence to any structures in the disclosure of the instant application for the recited means in the claim, a person of ordinary skill in the art cannot realize

Art Unit: 2432

from the disclosure what corresponding structures are intended for performing the recited functions in the claim. Therefore, claims 47-61 are subject to rejection under 35 U.S.C. 112, second paragraph. For this reason claims 47-61 are cancelled by Applicant.

Allowable Subject Matter

1. Claims 33, 35-43, and 46 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 33 and 47 are the inclusion of limitations that are not found in the prior arts and they are uniquely distinct features. The closest prior arts are Sharma et al (2002/0068559 A1), Albert (2003/0177389 A1) and Nordstrom et al (7,136,907 B1). Sharma discloses Systems and methods of providing mobile network management of assets on a network. Sharma further discloses a network management server that controls the network asset and the network asset is connected to the network management server via a connection path. A secure communication path is established between the network management server and a mobile wireless capable device. Sharma also discloses that the network is administered via the secure communication path with the mobile wireless capable device. Albert discloses a system providing methods regulating access at a computing system or device as required for connection of the device to a network. Albert further discloses a connection manager, a rules engine and a security enforcement module. Upon receipt of a request for connection to a network, the connection manager determines access security rules which are required to allow connection of the device to

Art Unit: 2432

the network. Albert also discloses that the rules engine automatically generates a current access policy for regulating access at the computing device as required for connection to a network

However, the above arts, singularly or in combination, fail to anticipate or render the following unique limitations of the independent claims in the instant invention:

“Claim 33: detecting at least one domain on the network in accordance with the parameters defined in the scan profile,

detecting at least one computing node within the detected domain in accordance with the parameters defined in the scan profile, and

connecting to at least one of the detected computing nodes in accordance with the parameters defined in the scan profile.”

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
